DETAILED ACTION

1. In response to the Office action mailed April 26, 2007, the Amendment has been received on June 20, 2007.

Claims 1 and 17-21 have been canceled.

Claims 2-4, 11-13 and 16 have been amended.

Claims 2-16 are currently pending in this application.

Allowable Subject Matter

2. Claims 2-16 are allowed.

3. The following is an examiner's statement of reasons for allowance:

 Claim 5 is allowed because prior art fails to teach or make obvious a cooling system for components of a computer tomography system arranged in a gantry housing, comprising: an annular carrier ring being rotatable around a measurement space in the gantry housing; and at least one exhaust element mounted stationary and disposed in or on the gantry housing through which a compressed air flows onto the components passing the at least one exhaust element upon a rotation of the carrier ring as claimed in combination with all of the remaining limitations of the claim. Claims 2-4, 6-14 and 16 are allowable by virtue of their dependence.

Claim 15, prior art fails to teach or make obvious a cooling system for components of a computer tomography system arranged in a gantry housing,

Art Unit: 2882

comprising: two coaxial bearings on two opposite sides on a stationary part of the computer tomography system by which the gantry housing is positioned around an axis, the cooling system being fashioned such that the heated air in a region of at least one of the bearings is guided out of the gantry housing in the stationary part as claimed in combination with all of the remaining limitations of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

4. Applicant's arguments, see pages 5 and 6, filed June 20, 2007, with respect to claims 2-4 and 16 have been fully considered and are persuasive. The rejection of claims 2-4 and 16 has been withdrawn.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Zupancic et al. (US Patent 4,969,167) teaches a computer tomography cooling system and method.
